

About me:

From 2013 National Technical University “Kyiv Polytechnic Institute” on Faculty of Informatics and Computer Technology (speciality: “Information control systems and technologies”)

+380-(93)-582-5956

5 Vasyl Symonenko Street, apt. 102, Kyiv, 03189, Ukraine

shyshkin.vladyslav@gmail.com

Sex: male | **Birthday date:** 20.07.1996 | **Nationality:** Ukrainian

Skills:

Programming languages: Java SE, Java EE (Servlets, Spring MVC, JSF, JDBC, JSP, JSTL), Java FX, C#, C++, SQL, HTML, CSS

Another experience: Git , OC Linux, Tomcat, JBoss(WildFly), Glassfish, Apache, MySQL, MSSQL

Knowledge: discrete math, theory of algorithms

Languages: Ukrainian, Russian, English (Pre-Intermediate)

Targets:

Work in the developing fields

Improve programming skills and get new knowledge and experience

To work as a junior programmer in an organization, where I will get an opportunity to establish my career as a programmer

Summary of Skills:

Resistant to stress

Ability to perform multiple tasks

Can work with advanced and new technologies efficiently

Job Responsibilities:

Programming using languages like Java and .NET

Planning, designing and coding for projects

Communicating with clients

Working with Java EE, Java SE, C#

Experience:

Language	Description	Link
Java EE	This is site on the subject of music containing next functionality: registration and authorization, personal messages, news, fix list, feedback, search and play sounds. Site has an admin-panel where you can add, edit, delete news,	https://github.com/shyslav/JavaEE_MusicBox

	sounds, authors, fix list, download music and pictures to the server. You can see changes without adding to database, review statistic. I've been using MySql database and framework Spring MVC.	
Java FX	This is address book, which has contact list, opportunity to add, edit, delete and search contacts. You can change language to English or Ukrainian.	https://github.com/shyslav/Ja-vaFX-AdressBook
Java SE	Simple chat between server and clients. Many clients can connect to server.	https://github.com/shyslav/Ja-vaSE-JavaSocketChat
Java SE	The form written on Swing to control employee database. Main functions: add, edit, delete in database. I used MySQL in this project.	https://github.com/shyslav/Ja-vaSE-WorkWithDatabase-Swing
C#	The program, which groups data about airline's flights. I used MSSql.	https://github.com/shyslav/CS-harp-Enterprise
C#	In this program you can control company's data and customer's database, relocation and availability of products, employees. You can add the images, create checks and etc.	https://github.com/shyslav/CS-harp-STVLED

Hobbies:

During the free time, I read technical literature, watch documental films, and read about innovative technologies and new software. I enjoy reading interesting news on habrahabr, cooking and watering houseplants.
